10:30 The Elements - Bromine

In its natural elemental form, bromine is a nasty pungent brown liquid. It's used in a wide variety of chemicals with long, scary-sounding names, many of which have sparked health scares - from fracking, to food additives, to carcinogenic flame retardants. But is bromine really such a noxious material, or has it just been the victim of 'chemophobia' - an irrational public fear of all things chemical? Justin Rowlatt investigates. (BBC)

11:06 The Retro Cocktail Hour

An hour of music that's "shaken, not stirred" every week from the Underground Martini Bunker at Kansas Public Radio (4 of 4, KPR)
